

# About Web

The work that is involved in developing a website for internet or intranet is known as web development. It can be ranged from developing a simple single static page of plain text to web applications, electronic business and social network services. The word web development is made of two words, that is:

Web: It refers to websites, web pages or anything that work over the internet.

Development: Building the application from scratch.

There are two ways hat the web development can be classified into. They are:

Frontend Development: The part of a website that the user interacts directly is termed as front end . It is also referred to as the 'Client side' of the application.

Backend development: Backend is the server side of the website. It is the part of the website that users cannot see and interact. It is the portion of software that does not come in direct contact with the users.
