Web development

Web development refers to the building, creating, and maintaining of websites. It includes aspects such as web design, web publishing, web programing, and database management. It is the creation of an application that works over the internet i.e. Websites.

Web Development

The word Web Development is made up of two words, that is:

Web: It refers to websites, web pages or anything that works over the internet.

Development: Building the application from scratch.

Web Development can be classified into two ways:

Frontend Development: The part of a website that the user interacts directly is termed as front end. It is also referred to as the 'client side' of the application.

Backend Development: Backend is the server side of a website. It is the part of the website that users cannot see and interact. It is the part of the website that users cannot see and interact. It is the portion of a software that does not come in direct contact with the users. It is used to store and arrange data.
